

Executive Summary

Group Plan Solutions, a division of Pekin Life Insurance Company, was established to help guide employers through the maze of health care reform, providing direction for optimal solutions to employee benefit needs.

At Pekin Life Insurance Company, we have been providing outstanding benefit administration services to our group health insured for nearly half a century. Recognizing our long history of expertise in employee benefit administration and our all encompassing commitment to providing service that goes *Beyond the expected*,[®] Group Plan Solutions, a third party administration unit, was created to extend our professional support to businesses that prefer to self-fund their benefits.

Our GPS staff has many years of experience in matching employers with first-rate benefits and then prudently administering those benefits. Many TPAs focus on how quickly claims are processed. We focus on making sure the claims have been examined for ways to save the employer money, while still making sure the employees are paid the benefits promised to them. You can trust that we will be as fiscally responsible with your group's self-funded benefit dollars as we have been with claims we have processed as an insurance company.

Group Plan Solutions has the expertise and experience to effectively and efficiently guide the administration of employees' benefit claims for self-funded health plans. With a commitment to settling health care plan claims in an accurate and timely manner, you can be assured that the employees' benefit claims will be taken care of professionally and with the highest level of service possible.

Our focus is providing the best service in the administration of employee benefits.
